

ABHINAV YADAV

Aspiring Data Scientist | ML Enthusiast

[KHARGONE, MADHYA PRADESH] • [abhinavyadav1673@gmail.com] • [9893946291]

GitHub: github.com/abhinav-1067 • LinkedIn: [<https://www.linkedin.com/in/abhinav-yadav-3a4a05375/>] • Portfolio: portfolio-websitetgit-hnmvrrp2qijefighphmstz.streamlit.app

PROFESSIONAL SUMMARY

Data Science fresher pursuing a B.Tech in Computer Science, seeking a Data Scientist / Machine Learning internship. Hands-on experience with data cleaning, exploratory data analysis, and building data pipelines using Python, NumPy, Pandas, and SQL, developed through self-driven and academic projects. Currently building proficiency in machine learning model training and evaluation, as well as Streamlit-based dashboards for deploying data-driven applications. Strong problem-solving mindset with a focus on writing clean, well-documented code and version-controlled workflows using Git and GitHub.

TECHNICAL SKILLS

Programming: Python, C++ (basics), SQL

Data Analysis: NumPy, Pandas, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Statistics Fundamentals

Data Visualization: Matplotlib, Seaborn, Interactive Dashboards

Machine Learning: Scikit-learn, Model Training, Model Evaluation, Classification, Regression.

Databases: SQL, SQLite, Database Handling

Deployment / Development Tools: Streamlit, Flask, VS Code, Jupyter Notebook, Anaconda

Version Control: Git, GitHub

PROJECTS

Student Performance Analyzer | Python, SQLite, Data Analysis, Visualization

- Built a data analysis application to track and evaluate student performance records, using SQLite for structured, persistent data storage.
- Designed a modular codebase (database, analysis, and visualization layers) to separate data access, processing, and reporting logic.
- Performed data cleaning and analysis on stored records to generate performance insights and trends.
- Developed visualizations to graphically represent student performance metrics, making trends easier to interpret. [ADD DATASET SIZE / SPECIFIC METRIC OR OUTCOME]

Sales Data Analyzer | Python, NumPy

- Developed a sales data analysis tool using NumPy to process and analyze numerical sales datasets efficiently.
- Used `numpy.genfromtxt` to import and parse structured sales data directly from file for analysis.
- Applied array-based operations to compute summary statistics and identify sales trends. [ADD DATASET SIZE / SPECIFIC METRIC OR OUTCOME]

IPL Data Analysis & REST API | Python, Flask, Data Analysis, JSON

- Built a Flask-based REST API to serve IPL (cricket) team and match data through query-parameter-driven endpoints.
- Designed JSON response structures for team-vs-team comparisons, enabling programmatic access to structured cricket statistics.
- Analyzed IPL datasets to extract team and match-level insights, applying data cleaning and processing techniques before analysis.
- Implemented RESTful routing and request handling to support flexible, parameterized data queries. [ADD DATASET SOURCE / SPECIFIC OUTCOME]

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

[RGPV UNIVERSITY], [KHARGONE, MADHYA PRADESH] • 1st Year (Expected Graduation: [2030])
